recovery**

**Flushes out toxins
& metabolic waste**

WHAT IS THE BALLANCER®PRO?

The Ballancer®Pro system is a groundbreaking state-of-the-art compression therapy system that delivers a multi-faceted and effective answer to body maintenance, beauty and wellness.

By stimulating the lymphatic system the Ballancer®Pro brings fast and reliable results in the most comfortable setting.

The system gently and thoroughly decongests problem areas of the body and helps release fluids and toxins faster.

The Ballancer®Pro is FDA cleared and non-invasive.

BALLANCER® PRO - NOW AVAILABLE IN THE U.S.

Just recently introduced to the US for the first time it is backed by 40 years of proven clinical studies from all across Europe. Ballancer® Systems are known as the 'gold standard' for lymphatic drainage, enhancing circulation and recovery time as well as reducing muscular aches & pain.

THE SYNERGY-EFFECT:

The Ballancer®Pro is frequently combined with other treatments for optimum results.

It can enhance the desired outcome after CoolSculpting®, RF, Exilis, Cryotherapy, EMSculpt®, Ultrasound, Endermologie, MLD as well as Kybella® and injectables.

After any surgical procedure, liposuction or mommy makeover lymphatic drainage is highly recommended to help recover faster and to reduce swelling and bruising.

HOW DOES IT WORK?

Two patent-protected specialized garments consisting of 24 chambers gently and systematically work on every area of the body. While the pressure moves in a precisely calibrated wave-like motion, the treatment provides maximum comfort and relaxation.

The Ballancer®Pro pants work on stomach, hips, thighs and buttocks. The jacket works on the upper body, arms and back.

HOW FAST WILL I SEE RESULTS ?

Results can be felt and seen immediately after the first session. Positive results are usually reported during and after a series of 12 sessions over the course of three to four weeks.

IS THERE ANY DOWNTIME?

There is no downtime, in fact combined with other treatments, the Ballancer®Pro reduces downtime and speeds up recovery.

HOW LONG IS EACH TREATMENT SESSION ?

The duration of each session ranges from 40 to 60 minutes.

WHICH BENEFITS ARE MOST COMMON ?

A series of Ballancer®Pro treatments help flush out toxins and retained fluids, this can reduce volume in the abdomen, upper arms, buttocks and legs and improve the appearance of cellulite.

Each session helps with circulation, getting freshly oxygenated blood to the cells and tissue, which can improve skin tone and smooth the skin. The relaxing abdominal massage can also help with digestive issues.

The Ballancer®Pro is also used for athletic recovery after an intense workout. Many professional athletes are able to gain a competitive edge by reducing their recovery time after intense workouts.
